

However, he did state that mixing-and-matching data is laboratory data, meaning that results often reflect what you would see clinically. Fauci added that the FDA will continue to look at data of what authorizations will be made for booster shots.

Data might not yet be conclusive, so what type of booster shots recipients of the J&J vaccine receive will mostly be conducted on a case-by-case basis, according to Fauci.

Fauci continued to preach the importance of getting vaccinated and receiving booster shots. Getting vaccinated not only will help fight against severe infections and hospitalizations, taking a booster shot will allow people to reunite with loved ones for the holidays.

"If you're vaccinated and your family members are vaccinated, you can enjoy the holidays," Fauci said. "You can enjoy Halloween, trick-or-treating, and certainly Thanksgiving and Christmas with your family."
